# 5 TOP FIVE REASONS YOUR BUSINESS
NEEDS EDR

Aptica LLC

Endpoint Detection and Response (EDR) is a security software that protects businesses like yours from cyberthreats by continuously monitoring all network endpoint devices, such as laptops, desktops, mobile phones, etc., used by your employees or customers.

01

Comprehensive endpoint visibility & monitoring

Gain enhanced visibility into your endpoint activities, including user behavior and file modifications.

02

Advanced threat detection

Identify and isolate malware or suspicious files before they can hurt your business operations.

03

Real-time incident response & mitigation

Detect and respond in real-time to minimize downtime and reduce loss.

04

Compliance & data protection

Safeguard your data and demonstrate compliance through strong security controls and incident response capabilities.

05

Reduce dwell time

Limit the damage of a cyberattack by reducing the time attackers remain undetected within your network.

Protecting your business starts with protecting your endpoints. Let's get started today!

TAKE ACTION NOW!
